SHOCK, FIRE HAZARD SERVICE TEST:

CAUTION: After servicing this appliance and prior to returning to customer, measure the resistance between either primary AC cord connector pins (with unit NOT connected to AC mains and its Power switch ON), and the face or Front Panel of product and controls and chassis bottom.
Any resistance measurement less than 1 Megohms should cause unit to be repaired or corrected before AC power is applied, and verified before return to user/customer.
Ref.UL Standard NO.1492.

NOTE ON SAFETY:

Symbol ⚡: Fire or electrical shock hazard. Only original parts should be used to replace any part with symbol ⚡. Any other component substitution (other than original type), may increase risk or fire or electrical shock hazard.

WARNING
All ICs and many other semi-conductors are susceptible to electrostatic discharges (ESD). Careless handling during repair can reduce life expectancy.
When repairing make sure that you are connected with the same potential as the mass of the set via a wrist strap with resistance.
Keep components and tools also at this potential.

ATTENTION

Tous les IC et beaucoup d'autres semi-conducteurs sont sensibles aux décharges électrostatiques (ESD). Une manipulation négligente pendant la réparation peut réduire la durée de vie de l'appareil.
Lors de la réparation, assurez-vous d'être connecté au même potentiel que la masse de l'appareil à l'aide d'une ceinture de sécurité.
Gardez les composants et les outils également à ce potentiel.

WARNING

Alle IC und viele andere Halbleiter sind empfindlich gegen elektrostatische Entladungen (ESD). Unvorsichtige Behandlung bei der Reparatur kann die Lebensdauer drastisch verkürzen.
Sorgen Sie dafür, dass Sie im Reparaturzustand am Potenziell mit der Masse verbunden sind.
Halten Sie Bauteile und Werkzeuge ebenfalls auf diesem Potenziell.
